

Techrete Energy Management Policy Statement

Techrete recognises that environmental protection is one of the most important issues facing the world today and is committed to continual improvement and responsible energy management.

TECHRETE (Irl) Ltd

Production & Design

White Hart Road,
Stephenstown,
Balbriggan
Co. Dublin

www.techrete.ie

The 3 sources of energy we use in our production operations in Balbriggan in Ireland and Brigg in the UK, are electricity, gas and diesel. The Directors are committed to developing Techrete as a leading architectural precast manufacturer for sustainable energy use and to promote the importance of good energy management for the economic, social and environmental well-being of its business and neighbours. We are committed to working with suppliers and clients and supporting voluntary and government led initiatives in order to improve our energy management.

In addressing this statement, the Company will:

- implement and maintain ISEN16001 Energy Management Systems. The scope of the management system will be the consumption of supplied electricity, gas and diesel in our factories in Balbriggan and Brigg and supplied electricity in our offices in Leicester.
- make energy consumption visible to all staff and inform them how they can influence energy consumption without any impact on safety, quality or throughput.
- work with our subcontractors, supplier and clients to encourage efficient energy management and identify and share best practice and ways of reducing negative environmental impacts.
- set goals and targets for energy and CO₂ emission reductions
- monitor and report on the Company's energy consumption and identify and implement opportunities for improved efficiency.
- maintain all plant and equipment and control and manage systems and energy infrastructure in such a way as to minimise energy wastage.
- undertake regular energy audits
- keep ourselves fully informed of all relevant legislation, regulations and other requirements within the industry and monitor our operations to ensure compliance.
- pursue the use of renewable and alternative energy sources to supplement conventional energy sources.

TECHRETE (UK) Ltd
